

I would like to ask that the proposal that you are considering would take away from my privacy as a citizen. Currently we have a Telephone privacy law that limits the number of unwanted telephone solitiations that we recieve weekly. Please don't put me in a position of having to be rude to ignorant people who call me at home. I also hate when they can't even pronounce my name or can articulate their message. Please don't diminish the power of our law...We the citizens of Indiana like and support our current regulations.
